

# Thermia WT-V 200

## Volymtank speciellt konstruerad för värmepumpsdrift

**Thermia WT-V 200** is a 200-litre volume tank especially designed for heat pump operation. It can be used for volume boost, flow equalisation and reducing potential clicking in the heating system.

Thermia WT-V 200 consists of one insulated steel container with four connections at the top, for various operating alternatives, which makes it extra easy to adapt to various types of heating systems.

The Thermia series contains the following volume tanks: WT-V 100, WT-V 200, WT-V 300, WT-V 500 and WT-V 1000. Their names describe the volume of the tanks in litres.
